August Recap!

What I've done, and what is upcoming.

by [Cheeky Charlie](#) on September 2nd

August started in the middle of a very heavy course load! The beginning of the month was trying - with school, social commitments, and getting sick in the middle of it all! I am glad to seemingly be on the other end of that illness.

You may remember the mention of me being ill from my last newsletter.. and though I still have some blood work and other tests to be done, I think surgery has been ruled out!

My mystery illness had me a bit late on the publication of my [product reviews](#) as well, but at the beginning of the month I was able to launch my newest review on the [Curzy 1+](#) Check out my thoughts:

At this point I started to come around, was able to write my final exam, and the rest of the month has been absolutely peachy! (Like me ;))

I continue to be spoiled with the most amazing dates and gifts (not expected, but always appreciated), and this month I reached a milestone goal of reaching 10K followers on [twitter!](#)

You can keep up with me on that platform, as well as my [Instagram](#), and [Onlyfans](#) page (always up to date)

September Upcoming!

Which ways are you keen to keep up with me?

I tried to start this month with a little vacay.. But my car tires and the common cold were not in accordance with that..

I think that I may be in Halifax all of September.. Or maybe I'll end up in Toronto for a long weekend at the end? To be determined..

If you travel often, I'm sure you have seen the current prices to fly and stay in Toronto.. I will be keeping my eyes open in hopes of spending a long weekend with lovers there.. And if you're keen to see me you should keep an eye on my website.

This month I will also be starting a few new courses. I like to think they will be less strenuous than the ones I am finishing, but only time will tell. Keep your fingers crossed for me!

If you are keen to spend some time with me this September then make sure to head to my [website](#) to learn how to book. You can view what is currently listed on my schedule [here](#):
